

**To whom it may concern**

I am co-responsible for the Copenhagen practical course and workshop on biomacromolecules in solution studied with Small-Angle Scattering. *November 25-30 2007.*

I hereby certify that the full workload of the combined course and workshop will amount to a total of 3 ECTS point or ~75 hours. The work includes self-study of the written material in connection to the course, lectures and talks, tutorials and an experimental project at MaxLab in Lund. At the last day of the course, all students will give an oral presentation of their experimental project. This presentation will serve as an evaluation of the individual students.

Yours sincerely

Lise Arleth  
Associate Professor, Ph.D.
